British money at home

Use coins, pretend coins or amounts written on slips of paper.

Make a mini shop

Mark a pencil 30p, an apple 45p and a notebook 70p. Give your child an imaginary £1.

Choose two things

Would the pencil and apple fit within £1? Add the two prices. Count on from the total to 100p to find the change.

Try a different pair

Would the apple and notebook fit in the budget? How much more would you need?

Check together

Pencil plus apple is 75p, leaving 25p. Apple plus notebook is £1.15, which is 15p too much.

Draw or write what you found

You can say, show, point or write your answers.

Show or draw one example.

Explain what you noticed.
