Find 2D shapes at home

Look at outlines and flat faces, then sketch or trace what you find.

Find a circle

Look for a round lid or coaster. Trace the edge with a finger. Does it have any corners?

Find a triangle

Use three pencils to make a triangle. Count the sides and corners. Turn the triangle so one corner points the other way.

Find a rectangle

Look at a book cover or the face of a box. Count its four corners. Turn it. Which things stay the same?

Check together

A circle has no corners. A triangle has three sides and three corners. Turning an outline leaves its number of sides and corners unchanged.

Draw or write what you found

You can say, show, point or write your answers.

Show or draw one example.

Explain what you noticed.

Try a different example.
