GCSE Maths Foundation: Ratio and Proportion

Share twenty counters

You can draw, point, write or talk it through with someone.

Have a go

Two teams share 20 counters in the ratio 2 to 3. Draw five equal groups. Decide how many counters one group must contain.

Try another step

Label which groups belong to each team. Add the two shares to check your answer. How would the shares change if you started with 30 counters?

Check your thinking

With 20 counters the shares are 8 and 12. With 30 they are 12 and 18.
